Question 1

1.00/1.00

Merge is not supported by MySQL. The other possible way of doing the work of merge statement, is by using ON DUPLICATE KEY UPDATE in the insert statement. State TRUE or FALSE.

Select one:
- ● TRUE✔
- ● FALSE

The correct answer is: TRUE

Question 2

1.00/1.00

Which among the following tags belong to DML?

Select one or more:
- ☑ UPDATE✔
- ☑ DELETE✔
- ☐ CREATE
- ☐ ALTER

Your answer is correct.

The correct answers are: UPDATE, DELETE

Question 3

1.00/1.00

Consider the below table structure:

Column Name	DataType	Constraint
Empname	Varchar(20)	Not Null
EmpId	int(10)	PK
Phoneno	bigint(10)	Not Null

insert into employee(empid,empname)values('123','John');

When we issue the above insert command and if the statement fails,

what would be the reason.

Select one:

- The column order should not be changed.
- Value for phoneno is missing. ✔
- The statement will get executed successfully
- empid value should be given without single quotes.

Your answer is correct.

The correct answer is: Value for phoneno is missing.

Question 4

1.00/1.00

Examine the structure of the STUDENT table:

Column Name	DataType	Constraint
Stud_id	int(3)	PK
Name	Varchar(20)	Not Null
Address	Varchar(30)	
DOB	Date	

Which statement inserts a new row into the STUDENT table?

Select one:
- INSERT INTO student (stud_id, address, name, dob) ✔
  VALUES (101,'100 Main Street','Smith','1994-02-01');
- INSERT INTO student VALUES (101,'100 Main Street','17-JUN-99','Smith');
- INSERT INTO student (stud_id, address, dob)
  VALUES (101,'100 Main Street','17-JUN-99');
- INSERT INTO student VALUES (101,'Smith');

Your answer is correct.

The correct answer is: INSERT INTO student (stud_id, address, name, dob)
VALUES (101,'100 Main Street','Smith','1994-02-01');

Question 5

1.00/1.00

State True or False.

COMMIT ends the current transaction by making all pending data changes permanent.

Select one:
- TRUE ✔
- FALSE

Your answer is correct.

The correct answer is: TRUE
